

SolidMatrix[®] Surface Mount Fuses HA Series (High Current), 1206 Size

Res

Clearing Time Characteristics:

| % of current rating | Clearing time at 25°C |
|---------------------|-----------------------|
| 100% | 4 hours min. |
| 250% | 5 seconds max. |

Agency Approval:

Recognized Under the Components Program of UL. File Number: E232989.

Applications:

- Power tools
- PC & Notebook Server
- DC-DC convert Battery pack

•

Display

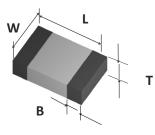

Ordering Information:

Features:

- Special products for high current rating applications •
- Glass ceramic monolithic structure
- Silver fusing element and silver termination with nickel and tin . plating
- **RoHS** compliant and lead-free materials
- Superior arc suppression capability .
- High current ratings •
- Symmetrical design with marking on both sides (optional)
- Operating temperature range: -55°C to 150°C (with de-rating)

SolidMatrix[®] Surface Mount Fuses

Electrical Specification:

Clearing Time Characteristics:

Same as specified on the Short Form Data Sheet

Insulation Resistance after Opening:

20,000 ohms typical when cleared with rated voltage applied. Fuse clearing under low voltage conditions may result in lower after clearing insulation resistance values. (Note: Under normal fault conditions (low or rated voltage conditions), AEM SolidMatrix fuses provide sufficient after clearing insulation resistance values for circuit protection.)

Current Carrying Capacity:

100% rated current at +25°C ambient for 4 hours minimum when evaluated per MIL-PRF-23419

Interrupt Ratings:

Same as specified in this catalog.

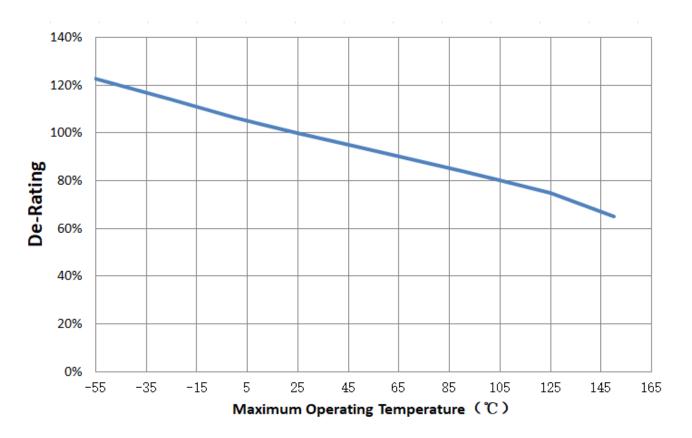

Fuse Selection and Temperature De-rating Guideline:

The ambient temperature affects the current carrying capacity of fuses. When a fuse is operating at a temperature higher than 25°C, the fuse shall be "de-rated".

To select a fuse from the catalog, the following rule may be followed:

Catalog Fuse Current Rating = Nominal Operating Current / 0.75 / % De-rating at the maximum operating temperature.

Example: At maximum operating temperature of 65° C, % De-rating is 90%. The nominal operating current is 4 A. The current rating for fuse selected from the catalog shall be: 4 / 0.75 / 90% = 5.9 or 6 A. Specifications and descriptions in this literature are as accurate as known at the time of publish, but are subject to change without notice.
