

Surface Mount Polymer PTC PAT1206 Series (Automotive Grade, 1206 Size)

Features:

- Automotive grade with AEC-Q200 qualification
- Operating temperature range up to 125°C
- Low thermal derating factor
- Higher hold currents at elevated temperature

Product Identification:

<u>PAT 1206 - 010</u>

- (1) (2) (3)
- (1) Series Code: Surface Mount Polymer PTC
- (2) Size Code: L x W (inch), the first two digits L (length), the last two digits W (width)
- (3) Current Rating Code: 010 0.10A

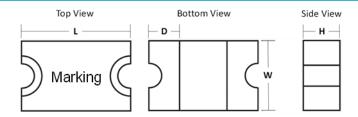

Applications:

- Protection of automotive circuitry including engine control modules
- Overcurrent surge protection of electronic equipment required to operate at high operating temperature ranges
- Resettable fault protection of general electronic equipment

Agency Approval:

Pending

Note:

- PAT1206 series cannot be wave soldered. Please contact AEM for hand soldering recommendations.
- If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
- Compatible with Pb and Pb-free solder reflow profiles.
- Excess solder may cause a short circuit, especially during hand soldering.

Caution:

Operation beyond the rated voltage or current may result in rupture electrical arcing or flame.

WARNING:

- Operation beyond the maximum ratings or improper use may result in device damage and possible electrical arcing and flame.
- The devices are intended for protection against occasional over-current or over-temperature fault conditions and should not be used when repeated fault conditions or prolonged trip events are anticipated.
- Contamination of the PPTC material with certain silicon based oils or some aggressive solvents can adversely impact the performance of the devices.
- Device performance can be impacted negatively if devices are handled in a manner inconsistent with recommended electronic, thermal and mechanical procedures for electronic components.
- Operation in circuit with a large inductance can generate a circuit voltage (L di/dt) above the rated voltage of the PPTC device.
